Responsive Classroom

What it is...

Responsive Classroom is a research- and evidence-based approach to elementary education that gives teachers the tools they need to be highly effective instructors. For over thirty years, schools and districts using this approach have experienced increased teacher effectiveness, higher student achievement, and improved school climate.

Why we do it...

- Higher quality standards-based instruction
- Greater student achievement in math and reading, regardless of socioeconomic background
- Greater gains for low-achieving students
- Improved social skills in children
- Improved teacher-student interactions
- More positive feelings toward school among children and teachers
